1 otherwise would not have written it.

2 Q Okay. But you just can't recall at this
3 moment where you found that?

4 A The exact location, no.

5 Q Okay. Either way, it doesn't change your
6 opinions, so -- whether or not she was vomiting or
7 not. Is that fair?

8 A That's fair.

9 Q Okay. Do you know if there's any
10 literature on what the -- on what risk is presented
11 when you use Kratom with central nervous system
12 depressants such as Benadryl and Phenergan?

13 A Sorry, can you repeat it?

14 Q Yes. Do you know, or -- if there is any
15 literature on what the risk is presented by the use
16 of Kratom with central nervous system depressants,
17 such as Benadryl and Phenergan?

18 A No.

19 Q Okay. You don't know, or...?

20 A I'm not aware of any literature that you
21 may be referring to.

22 Q Okay. All right. I want to talk to you
23 now about your, um -- how you came to your opinions
24 in this case. Okay? Obviously -- and I don't mean
25 physically how. I know you've looked at the scene

1 and I know you've reviewed the records and stuff.

2 But tell me, ultimately, what do you believe

3 Harmony Moller died of?

4 A Sudden cardiac arrest or arrhythmia in
5 the setting of a left coronary artery anomaly, and
6 hypertensive cardiovascular disease.

7 Q Okay. Now, so, you -- you -- I think we
8 actually agree that arrhythmia and sudden cardiac
9 arrest is the cause of death here. You just
10 eliminate Kratom as the cause. Is that fair?

11 A No, because sudden cardiac arrest or
12 arrhythmia is actually a mechanism of death, not a
13 cause of death. So --

14 Q Okay.

15 A -- cause of death is something that
16 results in that. Right? So a disease or an
17 illness or an injury. And so in this case, the
18 actual underlying cause is the coronary artery
19 anomaly and the hypertensive cardiovascular
20 disease.

21 Q Okay. So let me rephrase. We agree on
22 the mechanism of death, although we -- but we
23 disagree on the cause.

24 A Yes.

25 Q Is that fair? Okay. And you found that
